

Orbit Brand Identity: The Transformation Blueprint

A step-by-step guide to migrating your existing "Orbit" presentation

Three Phases. One Cohesive Identity.

This blueprint walks you through every change required to bring the new Orbit aesthetic to life across your entire deck.

1

Phase 1

Global Theme Updates

2

Phase 2

Updating Existing PDF Pages

3

Phase 3

New Brand Showcase Pages

Global Theme Updates

Apply these changes across your entire presentation before editing individual slides.

- ### Typography

All fonts → **Aventa**. SemiBold for headlines, Regular for body.
- ### Primary Background

Replace Deep Black with **Space Navy (#081C43)**.
- ### Accents & Highlights

Replace Cyber Lime with the **Orbit Gradient (#00BFFF → #A020F0)**.
- ### Textures

Swap Glassmorphism Layers for **Orbit Fluid Wave** graphics.

Title Slide & Visual Identity

Page 1 — Title Slide

Replace the flagship phone image with the "Real World" brand guide photo: a man holding a mobile gimbal with a gradient **"Get Started"** button overlay. Headline stays: *"Professional Cinema. Delivered in 60 Minutes."* — set in Aventa SemiBold, Pure White.

Page 2 — Redefining the Identity

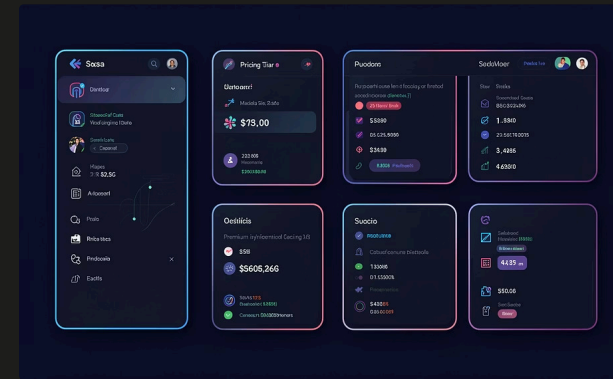

Rename the header to **"The Orbit Edge: Fluidity & Precision"**. Lead with Space Navy Canvas (#081C43) as the professional backdrop, and the Orbit Gradient as high-energy signals for live data, sync states, and active status.

Partner & Client Interfaces

Page 3 — Mission Control

Swap app screens for **Mobile Interface mockups** showing dark screens with glowing cyan/purple orbit rings. Update copy: *"A pulsing **Orbit Gradient ring** fills with a Data Stream animation..."*

Page 4 — Impact Dashboard

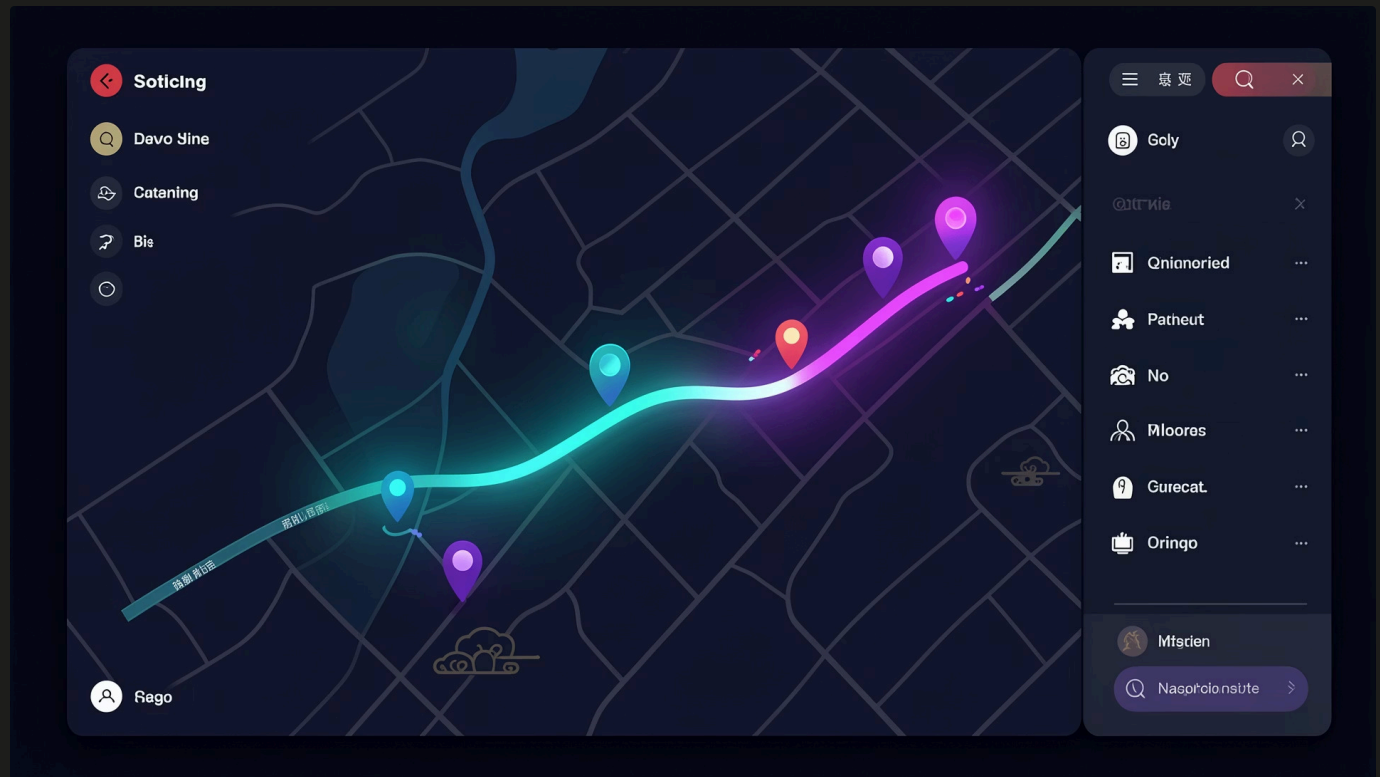

Update pricing card backgrounds to **Space Navy**. Rename the "Gold & Lime" tier to **"Gradient & Navy"**, fully integrating the new brand DNA into the client-facing experience.

Brand Experience: The Map

Page 5 — Visual Architect Route

The original dark-mode map features a lime-green route line tracking the Visual Architect's journey. Replace that accent with a sweeping line using the full **Orbit Gradient** (**#00BFFF** → **#A020F0**) — transforming a functional element into a brand moment.

- ❗ The gradient route line should feel like a live data stream, not a static path. Consider adding a subtle glow or motion blur effect if your tool supports it.

The Core Identity: Brand DNA & Typography

Space Navy

#081C43 — The anchor. A deep, professional backdrop grounding every visual experience.

Orbit Gradient

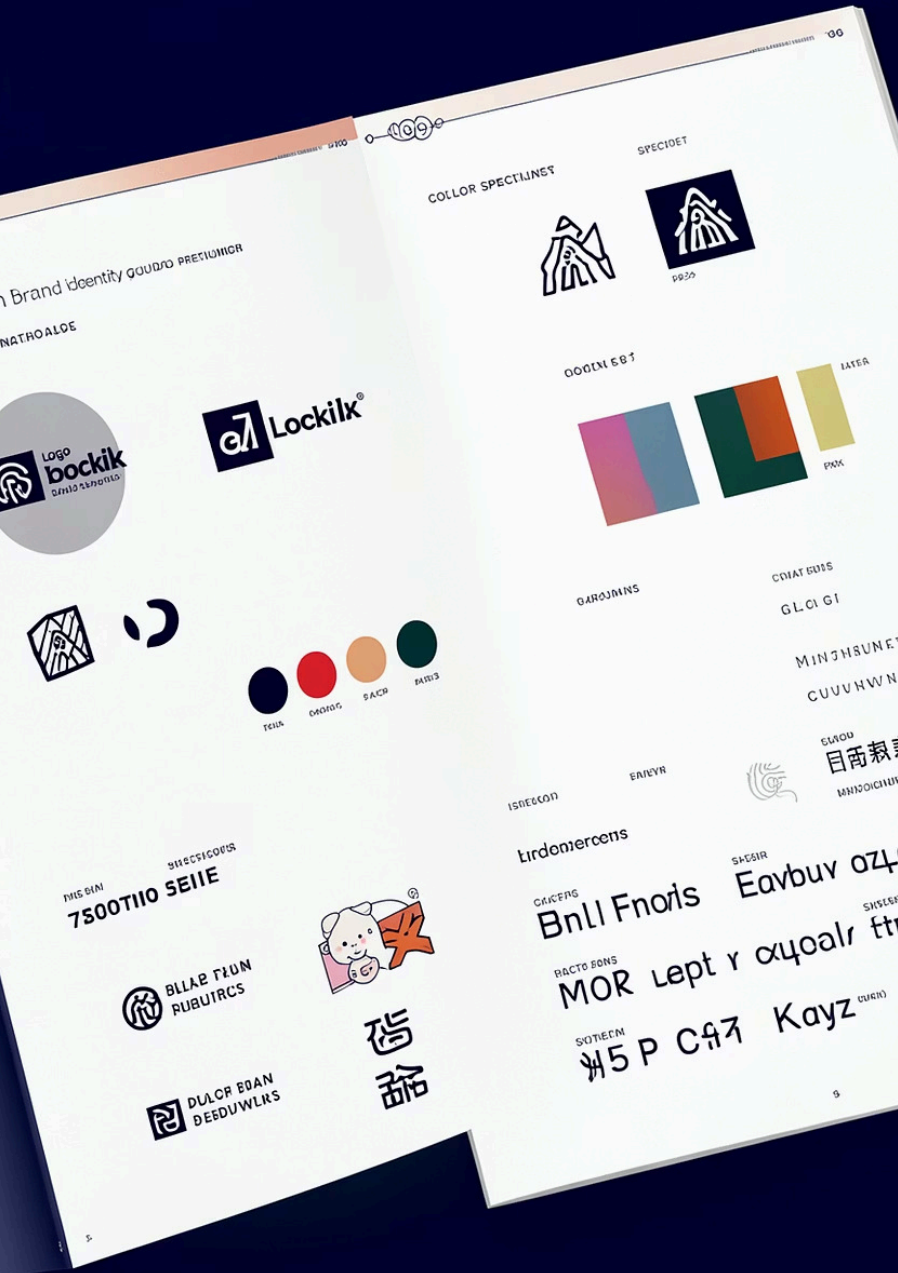

#00BFFF → #A020F0 — High-energy signals for live data, sync states, and active status.

Pure White

#FFFFFF — Maximum contrast for headlines and critical UI text on dark backgrounds.

Aventa Family

SemiBold for headlines, Regular for body. The exclusive typeface ensuring a modern, tech-forward feel.

Orbit in the Physical World

Merchandise & Collateral

The Orbit brand extends beyond the screen. The **Direct-to-Garment Gradient** on Eco-Cotton tees and totes carries the identity into everyday life, while **Space Navy business cards** deliver a premium, tactile experience for Visual Architects and clients alike.

Eco-Cotton Tees & Totes

Gradient logo applied via DTG printing for durability and vibrancy.

Business Cards

Minimalist Space Navy stock with subtle gradient accent — premium in hand.

Fluid Digital Storytelling

The signature **Orbit Fluid Wave** element anchors all digital advertising — from social ads to web banners. Insert the Tablet/Web Ad image from your brand guide to showcase this in action.

"Orbit delivers the world of curated, quick-form content. Discover stories that matter, with technology that orbits your world."

Rebuild in Gamma

Best for native gradient support and collaborative editing.

Migrate to Canva

Ideal for custom gradient graphics and advanced export options.
